SUMMARY

AI Engineer with 1.5+ years of internship experience in Generative AI, and Software Development. Published 2 IEEE papers and received a Best Paper Award for AI research. Experienced in Machine Learning, LLMs, RAG systems, AI Agents, and Android application development.

SKILLS

Languages	Python, SQL, JavaScript, HTML, CSS
AI/ML	LLMs, RAG, AI Agents, MCP, NLP, Computer Vision, Deep Learning
Frameworks	LangChain, LangGraph, CrewAI, PyTorch, TensorFlow, Scikit-learn
Web & Backend	Flask, FastAPI, RESTful APIs, API Integration
Databases & Tools	MongoDB, FAISS, ChromaDB, Git, Docker, Android Studio, Firebase, AWS

PROFESSIONAL EXPERIENCE

AI Intern

Apr 2026 - Present

Upstride - Chennai, Tamil Nadu, India (Remote)

- Built an end-to-end RAG chatbot using Selenium, FAISS, Sentence Transformers, and FLAN-T5, improving retrieval accuracy by 40%.
- Developed semantic search and backend APIs with FAISS indexing, reducing response time by 35% for dynamic website data.

App Development Intern

Sep 2025 - Jan 2026

Aarvasa - Bhopal, Madhya Pradesh, India (Remote)

- Built and optimized core Android application screens, improving UI responsiveness and reducing average load time by 40% on mid-range devices.
- Integrated Firebase Authentication, Firestore, and Cloud Storage to enable secure real-time synchronization for user interactions, while handling offline-first scenarios and authentication token expiry.

PROJECTS

AI-Powered Academic Research Engine | [GitHub](#)

- Built a multi-agent AI research engine with LangGraph and RAG, cutting literature review time from hours to under 30 seconds across 4 live academic sources.
- Developed a 9-node autonomous research pipeline with real-time streaming, domain routing, and critic-loop refinement, delivering evidence-backed answers with 89% consensus accuracy.

Farmer Assistance System | [Link](#)

- Designed and built a two-sided platform a mobile app for farmers and a web portal for agricultural experts to bridge the gap between rural growers and specialist knowledge.
- Set up a Flask server and trained a CNN model to classify crop diseases from images with more than 85% accuracy, videos, and voice inputs, giving experts richer context before they respond.
- Enabled multimedia-based guidance from experts, which was the feature farmers found most useful in early.

EDUCATION

M.Sc. in Artificial Intelligence and Machine Learning | CGPA: 8.40

July 2025 - Present

Vellore Institute of Technology (Vellore)

Bachelor of Computer Application | CGPA: 8.37

Sep 2022 - May 2025

Vellore Institute of Technology (Vellore)

ACHIEVEMENTS & CERTIFICATES

- Published two IEEE conference papers and received Best Paper Award for one publication | [Certificate](#)
- Udemy Certified: Python Programming, Generative AI & Large Language Models | [Certificate](#)
- DBT Hackathon Student Coordinator at VIT Vellore
